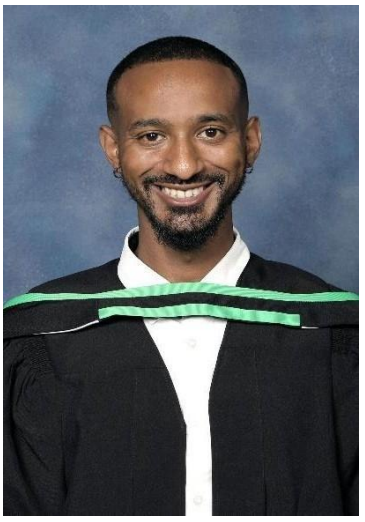
CURRICULUM VITAE DARYL MACK

Personal Details



Surname:	Mack
First Name:	Daryl Keenan
Physical Address:	17 Lakpypie Street, Randburg, Gauteng
ID number:	9801265313082
Nationality:	South African
Gender:	Male
Marital Status:	Single
Driver's License:	Code B
Cell Phone No:	061 423 6040
Email Address:	dkmack22@outlook.com
Language proficiency:	English and Afrikaans

PROFILE

With two years of experience in the civil engineering industry, consisting of Civil Engineer in 2023 and Structural Engineering in 2024, I have had the opportunity to work on a multitude of projects, gaining valuable experience in both construction, structural, and civil industry. Throughout my career, I have been involved in project management, site supervision, structural & civil design and detailing.

My experience spans the entire project lifecycle, from initial design to client handover, allowing me to develop a comprehensive understanding of project dynamics. I have particularly enjoyed working on office and concrete structure design, while gaining experience in warehouse and steel design.

Sustainability is one of the most important factors in my engineering and design. Taking into consideration cost effective design methodologies alongside ease of construction and minimizing use of harmful materials in construction. Efficient and sustainable design is the most important part of my design philosophy.

I am eager to obtain my PrEng certification and pursue further education in civil & structural engineering and project management. I am excited about the opportunity to contribute to your company and believe that my skills and experience would make me a valuable addition to your team.

EDUCATIONAL QUALIFICATIONS

Tertiary Qualifications

Institution: University Of Cape Town

Qualification: Bachelors of Science with Honors (Civil Engineering) – (2016 – 2022)

Courses:

- Structural design
- Transportation engineering and planning
- Urban water services
- Geotechnical engineering
- Hydraulic engineering
- Engineering hydrology
- Water and wastewater treatment

Secondary Qualifications

School: Athlone High School

Qualification: Matric – All subjects Higher Grade and Passed

Achievements: Top student in mathematics and physics

SKILLS

Project Related:

- Communication skills
- Adaptability
- Strong work ethic
- Problem-solving: critical and analytical thinking
- Teamwork
- Technical knowledge
- Leadership skills
- Creativity
- Risk Assessment

Social Skills:

- A quick learner, reliable, a team player, able to work under pressure.
- Punctual.
- Energetic, hard-working, ambitious, and eager to learn new ways to improve on my work ethics.
- Dedicated in working efficiently and attaining results.
- Experienced in delivering oral presentations, as well as organizational and written information.
- Possess strong liaison abilities with contractors and excellent communication skills.
- Able to work under pressure and manage stress and anger levels.

Computing Skills:

- Microsoft Office Suite
- Autodesk: AutoCAD & Revit
- Civil 3D
- Prokon – entire package
- EPANET

EMPLOYMENT HISTORY

1) **Company:** L&S Consulting (March 2025 – Feb 2026)
Job Title: Structural Engineer

Duties Included:

- Structural Steel and Connection Design
- Reinforced Concrete Design of singular and Multistorey buildings
- Reporting on structural investigations and providing recommendations
- Site inspections
- Site Meetings
- Project Management
- Steel shop drawings approvals
- Detailing of Steel for Construction
- Concrete Reinforcement Detailing

2) **Company:** Sotiralis (February 2024 – March 2025)
Job Title: Structural Engineer

Duties Included:

- Structural Steel and Connection Design
- Reinforced Concrete Design of singular and Multistorey buildings
- Site inspections
- Steel shop drawings approvals
- Detailing of Steel and Concrete drawings for Construction
- Basic Revit modelling
- Concrete Reinforcement Detailing

3) **Company:** Nadeson Consulting Services (January 2023 – February 2024)
Job Title: Civil Engineer

Duties Included:

- Managing and Designing of stormwater systems
- Design of stormwater, sanitation, and potable water pipelines for various developments
- Produce civil reports, provide specifications, and complete BoQ's and cost estimates of projects.
- Liasing with clients and project team members to adjust, amend and complete designs where necessary.
- Assistant civil engineer on the project management team undertaking a municipal sanitation master plan.
- Managing on site construction and undertaking inspection ensuring compliance with standards (SABS1200)

4) **Company:** SMEC Cape Town (January 2021 – March 2021)
Job Title: Part-time Apprentice Engineer

Duties Included:

- Inspecting contractor works ensuring work aligns with COLTO Standards and design drawings.
- Measurements of works to calculate material usage and payments to contractors.
- Overseeing contractor work as a junior site manager.

5) **Company:** E2C Engineering (July 2021)
Job Title: Student Engineer

Duties Included:

- Designing residential houses under supervision using Prokon.
- Inspection of reinforcement

PROJECT RELATED EXPERIENCE

Varon Rise Project – Accra Region, Ghana

Structural Engineer – Design of the Apartment Complex

- Seismic design of a 16-story reinforced concrete structure in accordance with Eurocode standards.
- Reinforced concrete padding design.
- Reinforced concrete column design.
- Reinforced concrete shaft design
- Reinforced concrete raft design.

Shoprite Middleburg Mall – Gauteng, South Africa

Structural Engineer – Overseeing the structural aspect of converting a Spar to a Shoprite

- Design of structural steel HVAC supporting system
- Design of structural steel Diffusor and Silencer support system
- Site Progress Meetings and solution discussions

Builders Warehouse – Gauteng, South Africa

Structural Engineer – Capacity checking, design, reporting, and proving recommendations

- Checking of structural steel capacity to determine feasibility of adding solar panels to roofs of a truss and castellated beam warehouse.
- Designing additional steel required in order to support the additional solar panel loading of a truss and castellated beam warehouse.
- Reporting on findings and providing optimized recommendations
- Inspection of existing steel conditions

Capital Boradwalk Hotel and Apartments – Port Elizabeth, South Africa

Structural Engineer – Design of the slab

- Design of the structural reinforcement of a flat slab
- Concrete slab reinforcement inspection

Liquor Runners Warehouse – Gauteng, South Africa

Structural Engineer – Design of the facility

- Design of the structural steel roof and columns
- Ground Beam and Pad footing design for the sinkhole prone area
- Design of tilt-up columns
- Design of tilt-up panels
- Analysis of DCP results
- Design and rebar drawings of 2-storey reinforced concrete office with a sinkhole analysis
- Design and rebar drawings of 2-storey reinforced concrete pilot office with a sinkhole analysis
- Management of the project
- Compilation and analysis of remedial work needed for damage and problems on sit
- Rebar inspections and concrete pre-pour approvals

Crusaders 2 Warehouse – Gauteng, South Africa

Structural Engineer – Design of the facility

- Design of the structural steel roof and columns

- Ground Beam and Pad footing design for the sinkhole prone area
- Design of tilt-up columns
- Design of tilt-up panels
- Analysis of DCP results
- Design and rebar drawings of 2-storey reinforced concrete office with a sinkhole analysis
- Design and rebar drawings of 2-storey reinforced concrete pilot office with a sinkhole analysis
- Compilation and analysis of remedial work needed for damage and problems on sit
- Rebar inspections and concrete pre-pour approvals

Merensky Warehouse – Gauteng, South Africa

Structural Engineer – Design of the facility

- Design of the structural steel roof and columns
- Pad footing design
- Design of tilt-up columns
- Design of tilt-up panels
- Steel roof inspection and compilation of documentation of faults found and remedial work to be done

Digistics Warehouse – Gauteng, South Africa

Structural Engineer – Design of the facility

- Re-design of the structural steel roof and columns to cater for large cooling units
- Pad footing design
- Retaining Wall Design
- Design of tilt-up columns
- Design of tilt-up panels
- Analysis of DCP results
- Design and rebar drawings of 2-storey reinforced concrete office with a sinkhole analysis
- Design and rebar drawings of 2-storey reinforced concrete pilot office with a sinkhole analysis

Signal Hill Brewery Warehouse – Gauteng, South Africa

Structural Engineer – Design of the facility

- Design and rebar drawings for several substructures around the warehouse catering for sinkholes in the area.
- Steel Design for several substructures around the warehouse.
- Screed design to accommodate wet areas
- Inspection of post-tensioned warehouse floor.

Transpharm Warehouse – Gauteng, South Africa

Structural Engineer – Post-Tension floors and Hardstands

- Rebar drawings for post-tension floors and pour strips
- Hardstand drawings

Western Cape Education Department Mobile Classrooms Drive – Western Cape, South Africa

- Civil Engineer leading the design of potable water, waste and stormwater networks for mobile classrooms across the Western Cape.

Matjhabeng Municipality – KwaZulu-Natal, South Africa

- Civil Engineer involved in the procurement of relevant information on the status of the effluent drainage system of the Matjhabeng Municipality.

- Involvement in the design of the Effluent Drainage and Wastewater Masterplan.
